**RUBBER DAM CLAMPS**

**MOLAR CLAMPS**

*With Dam-Engaging Projections (winged)*

3216

*Lower Molars. Small molar clamp. Flat jaws avoid gum impingement.*

3217

*Upper Molars. Same size as No. 3, but with festooned jaws that conform to the gum line and provide stable contact.*

3218

*Upper Molars. Large molar clamp. Festooned jaws conform to the curvature of the gum line and resist rotation.*

3219

*Upper Molars. Festooned jaws conform to the gum line and provide stability.*

3220

*For molar roots and partially erupted or irregularly-shaped smaller molars. Jaws have a four-point contact at the corners. Also useful as a Pedodontic molar clamp.*

3221

*Right and Left Molars. Particularly well-suited for third molars, but also useful for all lower molars. Serrated jaws. Offset jaw height provides stability over a wide range of conditions, including partially-erupted teeth.*

3222

*For partially-erupted or irregularly-shaped molars. Jaws are festooned for stable grip.*

3223

*Large molar clamp. For large partially-erupted or irregularly-shaped molars. Jaws are deeply festooned and have a four-point contact at the corners.*

3224

3225

*Lower Molars. General purpose clamp. Flat jaws avoid gum impingement.*

3226

*Upper Molars. Similar to No. 200, but with slightly more rounded jaws. Festooned jaws conform to gum line curvature and provide stability.*

3227

*Lower Molars. Large molar clamp. Similar to No. 200, but with larger jaws. Flat jaws avoid gum impingement.*

3228

*Right and Left Molars. For all small molars, but particularly recommended for lower molars. Also well-suited for Pedodontic application. Low bow.*

3229

3230

*Upper Molars. Large molar clamp. Sulf spring for firm hold on large molars. Moderately-festooned jaws conform to gum line and provide stability.*

**RUBBER DAM INSTRUMENTS**  
**KOFFERDAM INSTRUMENTE**  
**INSTRUMENTOS PARA GOMA DIQUE**  
**CRAMPONS A DIGUE**

**RUBBER DAM CLAMPS**

**MOLAR CLAMPS**

*Without Dam-Engaging Projections (wingless)*

3231

*For molar roots and partially-erupted or irregularly-shaped smaller molars. Jaws have a four-point contact at the corners. Also useful as a Pedodontic molar clamp.*

3232

*For partially-erupted or irregularly-shaped molars. Jaws are festooned for stable grip.*

3233

*Large molar clamp. For partially-erupted or irregularly-shaped large molars. Jaws are deeply festooned and have a four-point contact at the corners.*

3234

*Lower Molar. Large molar clamp. Large bow and jaws. Flat jaws avoid gum impingement.*

3235

*Delos Palmer molar clamp. Still bow.*

3236

*Left and Right Molars. For subgingival cavities on the buccal or lingual surfaces.*

3237

3238

*Upper Molars. Festooned jaws conform to gum curvature and provide stability.*

3239

*Lower Molars. Broad flange jaws provide increased clearance between dam surface and tooth crown. Flat jaws and reverse jaw bevel avoid gum impingement.*

3240

3241

*Festooned jaws conform to gum line curvature. Both flanges are beaked for stable grip.*

3242

*Left and Right Molars. Especially well-suited for third molars. Also useful for molar buccal cavities that extend below gingival line. Serated jaws. Offset jaw height provides stability over a wide range of conditions, including partially-erupted teeth.*

3243

3244

*Left and Right Molars. Beaked and festooned jaws provide stability.*

## RUBBER DAM INSTRUMENTS KOFFERDAM INSTRUMENTE INSTRUMENTOS PARA GOMA DIQUE CRAMPONS A DIGUE

### RUBBER DAM CLAMPS

#### BICUSPID CLAMPS

With Dam-Engaging Projections (winged)

3245

Narrow jaws for small bicuspid. High bow for extra clearance.

3246

For upper and lower bicuspid. Festooned jaws fit gum line curvature and provide stability.

3247

For upper and lower bicuspid. Same as No. 206, but with flat jaws that avoid gum impingement.

3248

Similar to No. 207 (flat jaws), but with larger jaws that adapt to large bicuspid.

3249

Primarily for lower bicuspid. Small, flat jaws for small bicuspid. Stiff bow.

#### BICUSPID CLAMPS

Without Dam-Engaging Projections (wingless)

3250

For upper and lower bicuspid. Flat jaws avoid gum impingement.

3251

For upper and lower bicuspid. Festooned jaws conform to curvature at gum line and provide stability.

3252

Primarily for lower bicuspid. Broad flange jaws provide increased clearance between dam surface and tooth crown. Flat jaws and reverse jaw bevel avoid gum impingement.

#### LABIAL CLAMPS

With Dam-Engaging Projections (winged)

3253

For labial cavities on central and incisors. Also useful in cases of missing bicuspid.

3254

Universal clamp for labial cavities on anterior teeth and incuspid.

#### CERVICAL CLAMPS

3255

For labial cavities on anterior teeth.

3256

Soft tension formable modification.

3257

Oblique jaw modification provides extra margin of protection for lingual tissues.
